Objective

Detail-oriented Junior Data Analyst with a Bachelor's degree in Information Technology and hands-on experience in data analysis, dashboard development, web scraping, and reporting. Proficient in Excel, Power BI, SQL, and Python to deliver actionable insights and support data-driven decision-making.

Skills

Skill: Python, SQL, Advanced Excel, Power BI, Tableau, Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, EDA, Data Visualization, Web Scraping

Experience

Hudl – Elite Projects Analyst

April 2026 – Present

- Analyze recorded game footage to identify key plays, events, and performance trends for coaching and analytics teams.
- Tag and annotate game footage within Hudl's proprietary software, ensuring accurate, structured data for post-game review.
- Maintain data quality and consistency across tagged datasets to support performance reporting and client deliverables.

Demand Curve Marketing – Data Analyst

Oct 2025 – Dec 2025

Executive

- Conducted web scraping using scripts/tools to extract large datasets from online platforms.
- Performed data cleaning and transformation to prepare high-quality datasets.
- Utilized scraped data for MIS reporting, trend analysis, and business decision-making.

Tax-o-smart - MIS Executive

March 2025 – Aug 2025

- Analyzed operational and financial data using Advanced Excel for reporting and insights.
- Automated recurring reports and ensured data accuracy through validation and cleaning.

Projects

Ola Ride Booking Data Analysis Dashboard | Power BI, DAX, Power Query, Excel | Live

- Developed an interactive Power BI dashboard analyzing 100K+ ride booking records to identify booking trends, cancellations, and revenue insights.
- Designed 10+ KPIs and DAX measures to track booking status, ride success rate, and operational performance.
- Built 15+ visualizations across 5+ dashboard pages enabling clear analysis of vehicle-type demand, customer ratings, and payment trends.
- Performed data cleaning and transformation on 100K+ rows of raw data using Power Query to improve reporting accuracy.

Netflix Movies Data Analysis (EDA) | Python, Pandas, NumPy, Matplotlib, Seaborn | Live

- Analyzed 9,827+ movie records using Python to identify trends in popularity, genre distribution, vote patterns, and release years.
- Transformed raw data into 25,552+ analysis-ready rows by cleaning date fields, categorizing ratings, and exploding multi-genre columns.
- Examined 9,415 unique titles across 38 genres and created 10+ visualizations to uncover content and popularity insights.

Credit Card Financial Dashboard | Power BI, Microsoft Excel, Power Query, DAX, Data Visualization | Live

- Built an interactive Power BI dashboard analyzing 667K+ credit card transactions to identify revenue trends and customer spending behavior.
- Processed and cleaned financial data in Excel, tracking key KPIs such as Total Revenue (57M), Interest (8M), and Transaction Amount (46M).
- Created 10+ visualizations with dynamic filters to analyze spending categories, payment modes, and customer segments.
- Generated insights on top revenue drivers, card categories, and customer demographics to support data-driven decision making.

Education

Thakur College, Mumbai

Dec 2021 – May 2024

Bachelor of Science (Information Technology)

Certifications

- I.T. Vedant Certificate: Excel.
- I.T. Vedant Certificate: SQL.
- IT Vedant Certificate: Power BI & Tableau
